

Corporate Simplification

What are the issues?

There are a number of issues that have pushed Corporate Simplification to the top of Boards' agendas:

- ! Cost reduction
- ! Enhancing value
- ! Transparency
- ! Regulation
- ! Risk management
- ! Tax and Transfer Pricing
- ! Transactions

How can we help?

Business case – we can help you quantify, evidence and draft your business case for the project using benchmarking data or through a review of your operations.

Project management – we can help you set up your corporate simplification project including advising on roles, reporting structure, phases and timelines. We can also support or act as project manager on the project or provide you with ad hoc or ongoing resource.

Design – we can help you design your optimal group structure and advise you on its implementation, including advising you on the restructuring, tax, transfer pricing, company secretarial and transactional aspects of the project

Review – we can help you with a high level feasibility review or the detailed entity by entity review during the project and advise you on the resolution of any issues arising.

Implementation – our specialist Licensed Insolvency Practitioners can act as liquidators in

members' voluntary (solvent) liquidations and we can help you implement the out of Court capital reduction and striking off processes. We can also act as liquidators, when required, in the Channel Islands and other European and Global jurisdictions through the Moore Stephens network.

Why Moore Stephens?

In-house corporate simplification projects can suffer from a loss of momentum caused by a lack of senior sponsorship or buy in from stakeholders, insufficient specialist resource or failing to progress the project due to a lack of experience of the risk, technical and commercial issues faced.

Our dedicated Corporate Simplification and Exits team specialises in corporate simplification, members' voluntary liquidations (MVLs) and managed exits and can help you deliver a successful project by providing as little or as much support as you require.

We have deep understanding of these projects in the context of the sector you operate in and can provide pragmatic solutions to blockers arising during the life of the engagement.

You will work alongside partners with over 15 years' experience of this type of work who will ensure a successful outcome whether on a project comprising solely the elimination of a small number of dormant entities or the simplification of a large cross border group.

A bespoke solution and a bespoke fee means value for money and our specialist team means we are able to provide a full service offering covering the restructuring, tax, transfer pricing, company secretarial and transactional aspects of the project where appropriate.
